

Build a Train

Materials: ziplock bags containing snap cubes of **two** colors

1. Work with a partner. Empty out a bag of snap cubes and sort them by color.
2. Build a train. Each carriage must have 10 cubes of the same color.
3. How many full carriages (tens) did you make? How many leftovers (ones) do you have?
4. Count the snap cubes by tens and ones. Draw the train and show how you counted the cubes.
