

Subtract Multiples of Ten

Materials: die, Base 10 blocks

1. Represent 90 using Base 10 blocks.
2. Roll a die and take away that number of tens.
3. Record how many you started with, how many you took away and how many are left.

$$90 - 30 = 60$$

I started with 90. I rolled a 3 and took away 3 tens, or 30. I have 60 left.

4. Roll and record five times.
