

Measuring with a Meter Stick

Materials: meter stick (or length of string 1 meter long)

1. Work with a partner. Choose five classroom objects. Estimate whether each object is:
 - a) less than one meter long
 - b) more than one meter long
 - c) exactly one meter long
2. Use a meter stick (or a one meter length of string) to measure each object.
3. Record your findings. Sketch and name each object that you measure.
