

Counting Collections

Materials: various collections of objects

1. Work with a partner. Group a collection of objects by tens. Count the objects.
2. Record your work. Show how many groups you made and how you counted the objects.
3. Group and count the same collection by fives. Record your strategy for counting.
4. Group and count the same collection by twos. Record your strategy for counting.

Counting Collections

Materials: various collections of objects

1. Put the objects in your collection into groups. Each group must have the same number of objects.
2. Use skip counting to count the total number of objects. Show how many groups you have and how you counted the total number of objects.
3. How many different ways can you group the objects so that there are none left over?
