Making Different Sized Squares

Materials: color tiles (or square pattern blocks), grid paper

- 1. Work with a partner. Use color tiles to make a larger square.
- 2. Build and record five different sized squares.
- 3. Order your squares from smallest to largest.
- 4. Draw your squares on grid paper.
- 5. For each square write an equation to show the number of color tiles in each row and the total number of squares used.
