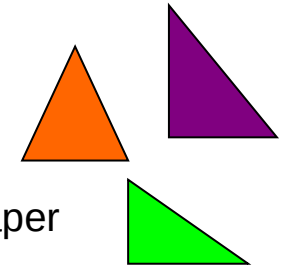
Triangle Hierarchy



Materials: one set of triangles per student, scissors, glue stick, rulers, blank paper

---

1. Create a hierarchy diagram using the following terms:

   Polygons, Triangles, Equilateral Triangle, Scalene Triangle, Isosceles Triangle

2. Measure and label the side lengths of each triangle.

3. Cut out and paste the triangles in the appropriate place on your diagram.

4. Explain your reasoning using mathematical language.
