

Number Puzzles

Print and laminate the puzzles. Cut each puzzle in vertical strips and place in a zip-lock bag. Use as a math center activity to develop skills in rote counting, numeral recognition and ordering numerals 1-20.

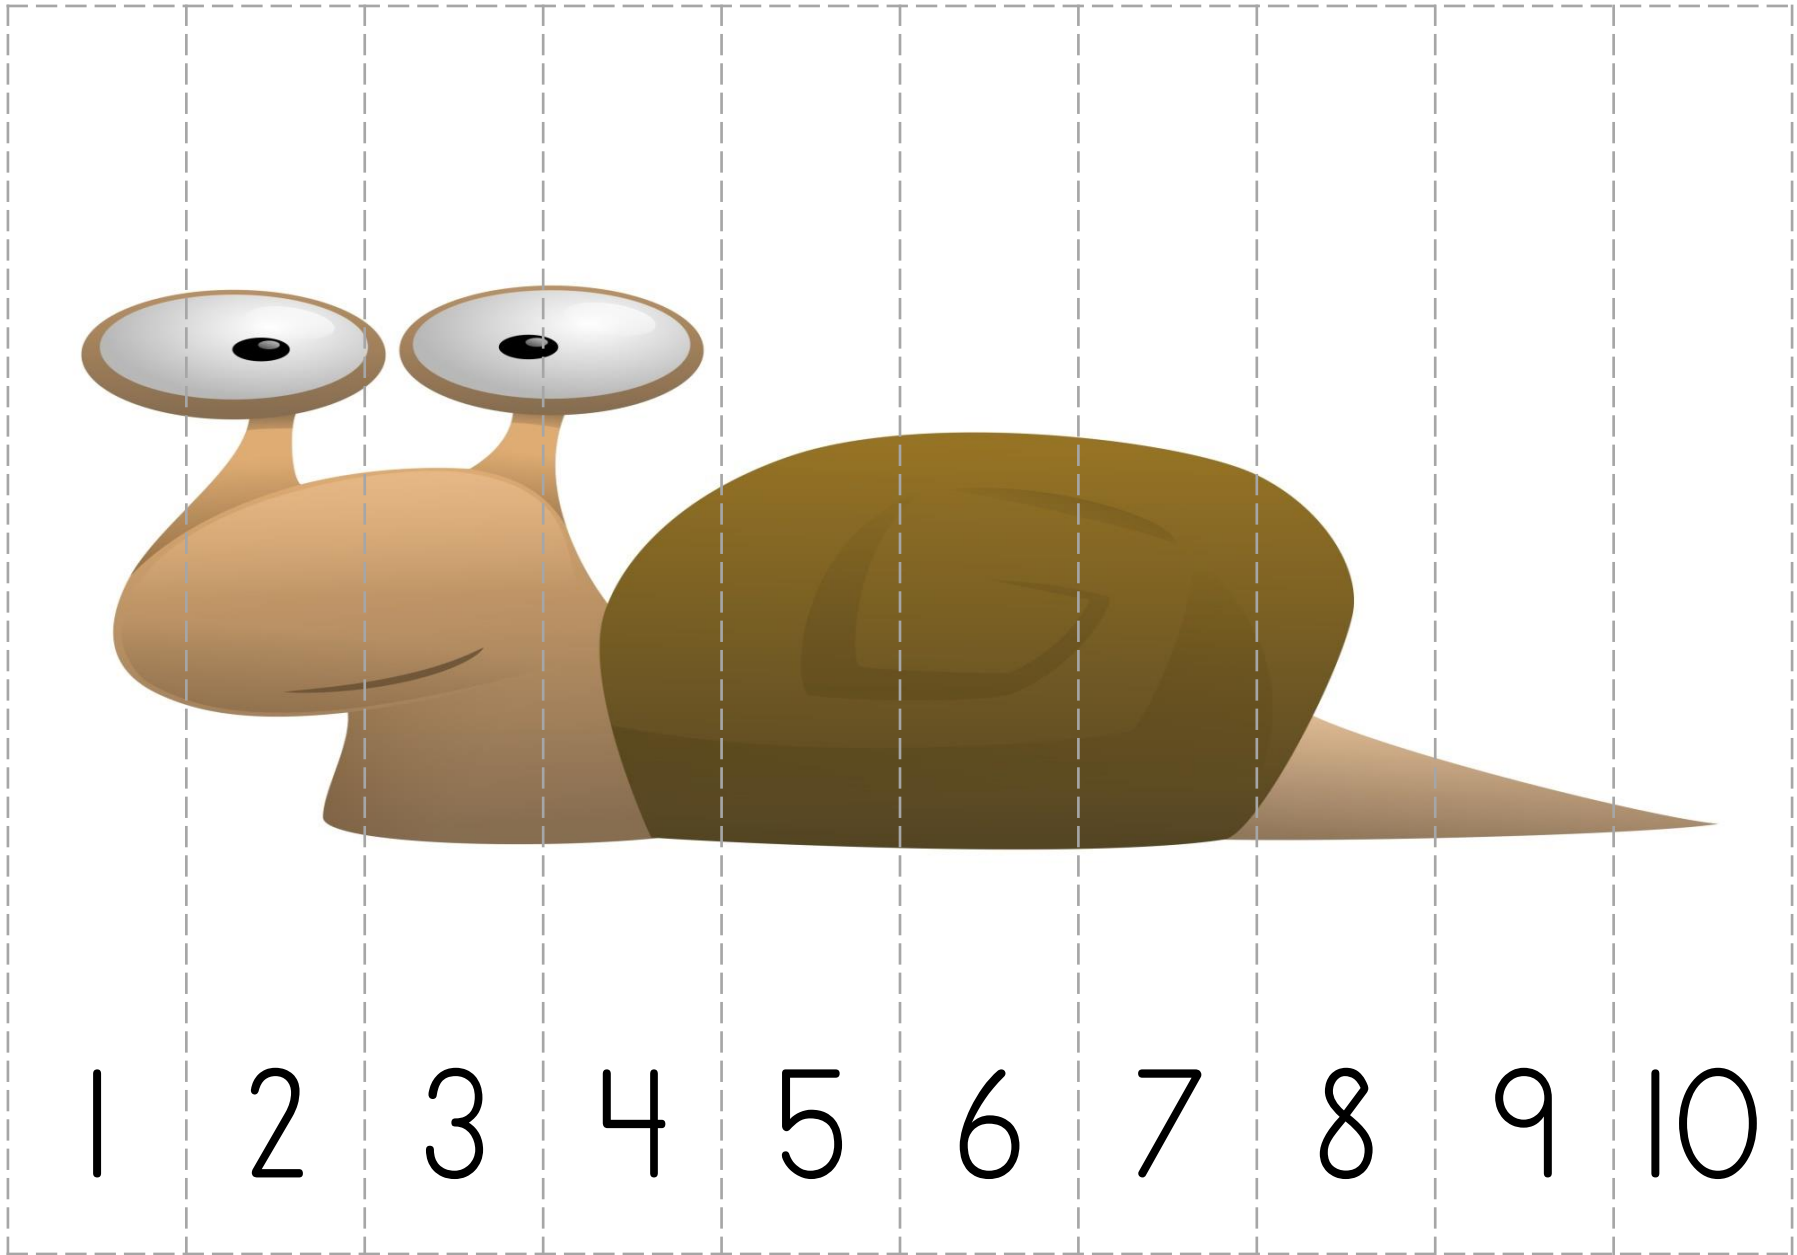

Hint: For students who need help keeping the strips in place:

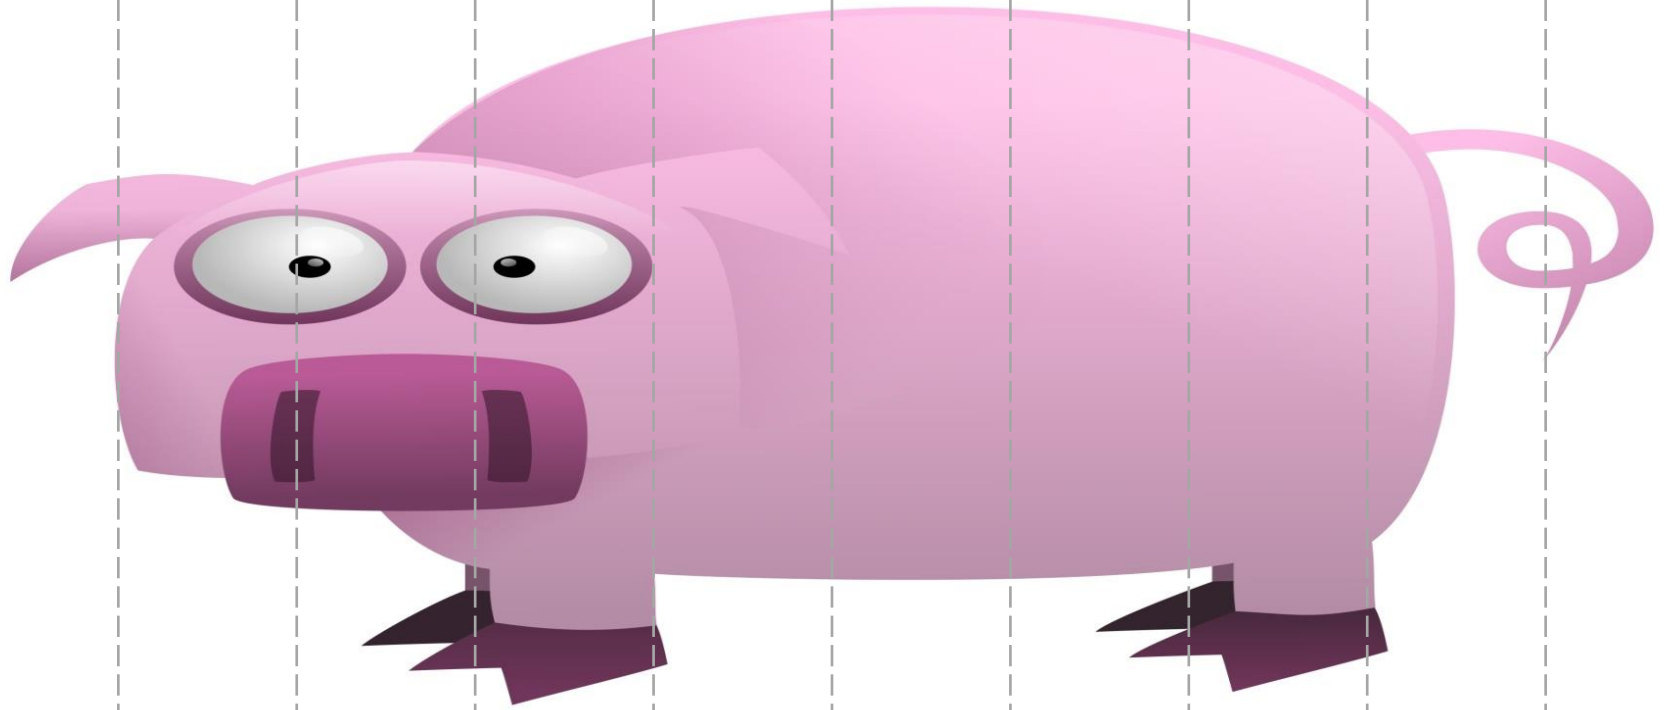

- use velcro dots on the back of each strip with a small felt board or
- attach a small strip of magnetic tape to each strip and use on a magnetic board or tray.
