

K.CC Find The Numbers 0-5 or 5-10

Task

The teacher will need to create 2-3 sets of six number cards (0,1,2,3,4,5) and a matching number die (0,1,2,3,4,5) for each set of students. Materials can be made from index cards and blank wooden cubes.

Students can play in pairs or trios. Each student places a set of the number cards 0-5 face up, in sequence, in front of him or herself. The students will take turns rolling the 0-5 die. After rolling he or she needs to find the matching number in the row of cards, say the number name out loud to the other student(s) and turn it face down. If a student rolls a number that they have already turned over they lose that turn. Students continue to roll until one student has no cards left face up. The student with all cards turned over first wins the game. Students may use a number line to help set up the cards in sequence.
