

K.OA Christina's Candies

Task

This task is meant to be presented as a sequence of questions posed by the teacher to the students.

Christina has 7 candies. Some of them are chocolate, and some of them are lemon.

- a. If she has one chocolate candy, how many lemon candies does she have if the rest are lemon?*

- b. If she has two chocolate candies, how many lemon candies does she have if the rest are lemon?*

- c. If she has 3, (4, 5, 6) chocolate candies, how many lemon candies does she have if the rest are lemon?*

Once a student finds one answer, ask him/her to find another. Ask the student to use objects, pictures, or equations to demonstrate his/her thinking. Not all pairs that total 7 are required to meet this standard, but students must include more than one.
